

Flex-Lite

INSULATED BULKHEAD

Design and Materials

- **ArmorTuf® Bulkhead Skins**
FRP Composite skins enhance the durability. The same materials trailer manufacturers now use as a wall liner.
- **Durable Scuff Liner**
HDPE scuff liner provides added protection against loading equipment.
- **Innovative Wear Band**
The Flex-Lite's wear band features a flexible fabric which reduces friction while positioning.

Unique Solution

The Flex-Lite utilizes a soft foam core with composite outer skins to absorb impact energy. Order a Flex-Lite today and experience the longevity of a semi-rigid composite bulkhead.

- **ArmorTuf® Advantages**
 - Unmatched strength and durability.
 - Won't tear or puncture like vinyl.
- **Core Properties**
 - Flexible and compressible impact resistant construction.
 - High density urethane foam.
 - Excellent thermal properties.
