

SMARTTRACK

TRACK SYSTEM + RE-FLEX®

A proven track system utilizing the lightest and best bulkhead in the business.

- Allows you to lift half the weight since you move only half of the bulkhead at a time.
- Has a fixed common cross bar, providing a more economical track bulkhead solution.
- Bulkheads never leave the trailer and are up and out of the way.
- The side lift assist assembly lets any operator pull (not lift) the bulkhead up to ceiling, easily raised and lowered.
- Three safety mechanisms. An automatic braking design, stop knots and security straps help to prevent injury.

IDEAL FOR GROCERY DISTRIBUTION • REDUCES DAMAGE & LOSS • INDUSTRY PROVEN
